

PRESENTATION TO
GAMBLE SCHOOLGAMBLE GETS PERMANENT
POSSESSION OF TROPHY

The Gamble school house was the scene of an informal gathering on Friday evening, November 27th. The purpose of the meeting was to present the Elks trophy to the Gamble School for School Fair work. This trophy was presented by the Elks Lodge in Carbon in 1928 for annual competition, and the school winning the cup three years in succession was to attain permanent possession. In 1928 the Carbon senior room won the cup. In the next three years, 1929, 1930 and 1931, the Gamble school took the most number of points in school fair work and as a result of the three successive years in winning the trophy, it becomes their permanent possession.

L. B. Hart acted as chairman of the gathering and the following program was successfully carried out:

Recitation, by H. White. Recitation by J. Congo. Story by Mrs. Hart. Recitation by Dorothy Hay. Reading by Mrs. Wm. Gibson. Reading by Mrs. L. Martin. Following this part of the program was the official presentation of the Elks Trophy, and J.J. Greenan of Carbon made the presentation. Mrs. S.N. Wright, Chairman of the School Board, thanked the Elks for their interest in the school fair work and for the trophy. D. G. Code on behalf of the Carbon School Fair, also thanked the donors for the trophy and congratulated the Gamble pupils and their teacher, Mrs. Moorhouse, on the splendid work and interest they had taken in the school fair each year.

At this time Mr. Hart, on behalf of the Gamble School district, read a letter of appreciation to the teacher, Mrs. Moorhouse, for her work in connection with school fair work and also with her school work in general.

Following this part of the program, E.J. Garland, M.P. for this, the Bow River constituency, addressed the audience on the Manchurian Question. Mr. Garland gave a very true conception of the trouble in that part of the world and many were enlightened on a subject that they have heard so much about lately, but on which they did not exactly understand.

The evening's entertainment was then brought to a close with the singing of the National Anthem, Mr. Wacker presiding at the piano.

Following the program the ladies of the Gamble district served a very delightful lunch in the school room.

BRIDGE PARTY AT MINE HALL

Mr. and Mrs. H. Brown, and Mr. and Mrs. H. Willson were hosts at a jolly bridge party at the Peerless Mine Hall on Thursday evening, November 26th. About twenty-five couples were present as guests and a very enjoyable evening was spent. Prize winners for the evening were: Ladies' first, Mrs. Edwards. Ladies' second, Mrs. L. Poxon. Ladies' consolation, Mrs. Jas. Ramsay. Gentlemen's first, A.F. McKibbin. Gentlemen's second, T. J. Ramsay. Consolation L.G. McQuade.

Following the cards a very delightful repast was served and the evening's entertainment was brought to a close, everyone expressing themselves as having a very enjoyable time.

ELEVEN YEARS AGO

(Gleaned from the Files of the Carbon News eleven years ago this month)

The steel on the railroad is only 4 miles from town.

The United Grain Growers meeting held on Saturday was well attended and great enthusiasm was shown as to the building of the elevator at once. The local board was appointed, viz: John Garrett, Geo. Craddock, Guy Shell, G. Ohlhauser and Jas. Gordon.

A new building is going up opposite the Imperial Lumber Yards and the rumors are that the post office will be transferred there.

Quite a few coal mine operators have visited the town lately. Among this week's visitors we noted Messrs. E. McBride, N. J. Christie, and F. Wonnacott, all of the Knee Hill Coal company.

The nominations for next year's council took place on Monday. Five citizens have been nominated as candidates, Messrs. W.A. Bralsher, Len Poxon, R.S. Shields, F.W. Wilson, and H. M. Thorburn.

The new premises of the Crown Lumber Company are now completed and Mr. Heys, the local painter, is following close behind with the paint and signs.

RETURN OF PUBLIC CON-
FIDENCE WILL RELEASE
VAST RESERVOIR FUNDS

It is confidently felt in high financial circles that all the elements required for success attend the current flotation of a loan for \$150,000,000 by the Dominion of Canada, through the Department of Finance. That all the money required by the Government to carry on the affairs of the country, without resort to outside markets, will be provided by investors is not questioned. As a sound investment in five and ten year 5 per cent bonds at attractive prices, is one which investors will be glad to obtain, it is felt that it is only necessary to lay the facts before the country and that the rest will be attended to.

Confidence is returning throughout the country after passing through a trying period of two years, during which prices of both commodities and securities sank to abnormally low levels. There is serene conviction that the decline has run its course and that the tide already started will be running strongly in the other direction before a great while.

Evidences of a turn in the tide of business for the better, with an accompanying return of confidence, are to be found on every hand. There has been an appreciable recovery in the prices of some commodities. That in wheat is of paramount interest to Canada at the present time when there is a heavy outflow to overseas markets. This, and a better distribution of merchandise throughout the country, has been indicated in a substantial recovery in the earnings of the country's two great transportation systems. The earnings for the first two weeks of November indicate that trade and commerce is undergoing improvement, when compared with the gross receipts for the corresponding periods of the two preceding months. The figures show that the enormous decreases which have been shown for many months past are now dwindling to almost nothing, and unless signs fail

ALBERTA NEWS

Cost of operating the Alberta Wheat Pool during the 1930-31 fiscal year was approximately three-fifths of a cent a bushel, as compared with four-fifths of a cent a bushel for the previous year.

The past week or two of cold weather got the skaters enthused, and a good sheet of ice was prepared on both the small and large rinks, with skating commencing Saturday. The thaw came along however, and dampened everyone's spirits as well as the ice.—Three Hills Capital.

Mr. Hovey of Rockyford had a very uncomfortable surprise on Monday last when he went into the basement after starting his lighting plant to find that it had started a fire near the plant. The blaze was extinguished.

A resolution passed by the Edmonton city council urges that a double track be laid between Edmonton and Calgary by the Canadian Pacific Railway, as a means of creating work for unemployed.

Word was received last Wednesday evening that Robert Warner, the lost Staveland hunter, had been found by a trapper in a cabin 30 miles from where he had become separated from his party.

Appointment of Robert English to Deputy minister of Municipal Affairs and John Harvie to Deputy minister of Lands and Mines was announced Friday by Hon. R.G. Reid, provincial treasurer, minister of lands and mines and minister of municipal affairs, who in the absence of Premier Brownlee in the East, is also acting premier.

Fred Bartlett, a young miner living at Midlandvale, Drumheller, despondent over his troubles, is alleged to have attempted suicide early Tuesday morning, by drinking a quantity of lysol. He was rushed to the hospital and is reported to be recovering.

John Francis Buckley, Liberal M.P. for Athabasca, was almost instantly killed near St. Paul on Friday night when a car in which he was riding went out of control and skidded head on into a team of horses, the tongue of the wagon plunging through the windshield and striking Mr. Buckley on the head with terrific impact.

It will be but a short time before the railways will be running well ahead of the tonnage they carried in the past couple of years.

Business people everywhere are in a better frame of mind and looking forward to the resumption of business on a broader scale. Meantime the Government must do some financing and it is in the interests of all concerned to see the flotation of this new internal loan result in great success.

The extent to which this is the case will be a measure of the public's confidence and a successful outcome will be of incalculable benefit to the maintenance of Canada's credit in the eyes of the world, where it has stood pre-eminent for many years.

That there is a great reservoir of wealth in Canada only awaiting to be tapped by an investment offering the very highest grade of security obtainable, is indicated by banking and trust corporation returns, which shows large sums held in trust for the public. That these will be released in large volume seems unquestionable. The return of confidence is the only thing that could be depended upon to turn on the tap.

CURLING CLUB TO STAGE DANCE

The Carbon Curling Club will put on a monster dance in the Farmers Exchange hall on Friday evening, December 11th and all arrangements have now been made for the event. The Rockyford four-piece orchestra has been engaged to play the music on this occasion and a record crowd is expected to attend, especially from the towns of Acme, Swaiwell and Rockyford, where already a number have signified their intention of coming to Carbon for the big event that evening. All tickets sold will bear a number and during the evening drawings will be made for valuable prizes. There will be three of these prizes to be drawn for during the evening of the dance. At midnight refreshments will be served. The admission charge is \$1.00 per couple, extra lady 25c. The proceeds of this dance will go towards the payment on the building of the Carbon Curling rink.

AN OLD STORY RE-TOLD

(The Calgary Albertan)

It is approximately one month until Christmas, and it is time for the annual suggestion to shop early. There seems to be nothing new which can be said in this connection. It is so obvious that everybody should shop early that it seems a little futile even to present the old, moth-eaten arguments.

People who shop early get the best goods, make the best bargains, receive the best attention, experience the least trouble—one could go on indefinitely. It has all been said before.

But is there any reason why the people of Calgary and district this year should make a particular point of doing their Christmas shopping early? There is—an excellent one. We have broken the back of depression, the greatest in the memory of any person in Alberta. That we have broken its back is now almost certain. The signs of improvement are everywhere. But we are not out of it. And the citizens who have been as badly hit as any by the depression are the retailers. They are watching for the definite turn of the tide with anxious eyes. Why not make the tide turn for them as soon as possible? Why not let them see three weeks or four weeks before Christmas that money is to be spent, and that prosperity will be in some evidence for most of us this Christmas? Why not set their minds at rest, and ease their difficulties, now rather than two weeks from now?

And there is an equally valid reason why everyone who can should make a point of spending as much as possible this Christmas. Press campaigns to loosen purse strings that during the depression were held unduly tight were not wholly successful. Many persons contributed to the depression by succumbing to the prevailing panic and hoarding when they could comfortably have placed money in circulation. And many of these have now developed a habit of hoarding. Christmas provides an excellent opportunity to let these purse strings go. It will be a happier time for all, if those who can will do so.

Concerted action against any increase in the gasoline tax was taken by the Calgary branch of the Alberta Motor Association at its annual meeting Friday night.

E.J. GARLAND M.P.
VISITS DISTRICTADDRESSES MEETINGS SATURDAY
AND SUNDAY AFTERNOONS

E. J. Garland, M.P. for the Bow River constituency has been in the district the past week and has addressed various meetings. On Saturday afternoon Mr. Garland addressed a meeting in the Elks hall, Carbon, his subject being "The Gold Standard," a good sized crowd turned out to hear Mr. Garland on this occasion.

On Sunday afternoon in the Farmers Exchange hall, a large crowd was present to hear Mr. Garland on "Peace." On this occasion Rev. Wm. McNichol acted as chairman and before the address Rev. Mr. Hibbert led the gathering in prayer.

Mr. Garland travelled all through the Eastern and Central States this summer and gave this address, and on every occasion large crowds greeted him in the cities and were present to hear this well known Canadian speaker. Mr. Garland's address on this occasion, as usual, was eloquent and inspiring and the subject embodied the evils of war as well as world peace. During the address Mr. Garland urged the meeting to pass a resolution and send it to Ottawa, urging that the Prime minister send only delegates to the League of Nations conference, who are absolutely in favor of World Peace. Following the meeting J.M. Macdonald moved such a resolution and it was sanctioned by the meeting, to be forwarded to the Prime Minister.

1500 BUFFALO TO BE KILLED
BY 'HUNTSMAN'

The Dominion government's "Buffalo Bill" will shoot 50 buffalo at Wainwright National Park next Monday and 50 each day thereafter until 1500 beasts have fallen. He is the only legalized slayer of buffalo in Canada and his "bag" is limited, all because of the indiscriminate slaughters of bygone days, by Indians, by pioneers, by the colorful Buffalo Bill of prairie lore who won contest in killing 69 wild buffalo and who bagged nearly 5000 in one 17-month period.

No animals were destroyed last year but in 1929 500 fell under the privileged killer's rifle; in 1928 2,000 fell. Thus the herd is being preserved, re-established from a handful of fugitives that escaped the wholesale killing that went on across the length and breadth of the North American continent.

Killing of buffalo was expedited by the introduction of "repeater" rifles, which facilitated rapid slaughter on the gallop. So plentiful was the supply that buffalo skins brought a dollar each at St. Louis.

It is estimated that there are at present more than 7,000 animals in the Wainwright preserve and the park is overtaxed as to its grazing possibilities.

Since 1925 live buffalo have been shipped from Wainwright to France, Belgium, South Africa, United States, New Zealand, Scotland, Australia, Italy and Holland.

Miss Ida Forsch was taken to Calgary early Wednesday morning to be operated on for appendicitis.

Mrs. E.J. Rouleau was a Calgary visitor on Tuesday.

Sharp Pains In His Heart Nerves In Bad Condition

Mr. Fred J. Chase, Thomson Station, N.S., writes:—"I have used Milburn's Heart and Nerve Pills with wonderful results. My heart would beat so fast I would have to sit down when at work chopping in the woods. I had sharp pains in my heart when I would lie down at night. My nerves were also in a very bad condition, but after using two boxes of Milburn's Heart and Nerve Pills I feel just fine, and am fourteen pounds heavier than I have been for years."

Present Day Heroes

This is a good time to keep eyes open for heroes, writes William T. Ellis in one of his syndicated newspaper articles.

None of us ever quite grow away from our childhood admiration for heroes, but as we grow older we realize that heroes and heroines are not confined to fairy tales, or tales of fiction, or even to historic happenings of by-gone ages. There are heroes among us at all times, and in all walks of life. They are unusually plentiful at the present time.

We would, with Mr. Ellis, enumerate the brave, self-respecting families who are finding a way to carry on normally; the employers who are straining financial and mental resources to keep their workers on the payroll; the women who are magnificently bearing the heaviest burdens of all; the public leaders who are keeping their heads and bending every effort toward helpfulness.

We think of a young Scotch lad, without education, whose parents with a numerous family of young children are on the dole in the Old Country, who came to Western Canada some years ago and laboured as a farm hand, sending of his meagre earnings to his mother. Then came crop failures and depression, and he became one of the big army of unemployed. Coming in to one of the cities he has courageously tackled any work he could get, perhaps only a fifteen minute task, some days in succession nothing at all, but he has never whined, never lost his courage, never allowed himself to slip into bad habits. He is just as particular about the cleanliness of his person and his patched-up clothes as during better times. Some of his chums welcomed deportation back home where they could get on the dole, but not he. He refused to go back to be a burden on others, saying times would change for the better, and that opportunities in Western Canada would then be greater than in the Old Land. So he sticks, cheerfully doing his best, and never complaining. He is a hero.

There is another young man,—and, thank God, there are myriads like him,—who is a victim of the times. He is an educated man, married, with a small family and his own home. When the bottom fell out of his world, he did not lose his head. Instead, he considered conditions a challenge to his capacities. Like a warrior suddenly beset by new foes, he simply called upon his prowess for redoubled valour. Because he has brains, he knew that it lay with himself whether he should come out of the conflict a spiritual victor or victim. That is to say, he perceived that whatever happened to his estate, the real man could not be defeated.

So with head up and a smile of confidence on his face, he has fared forth to do new battle with business. With indomitable persistence and ingenuity, he has tried one venture after another. Today, he is making a livelihood, but no more; yet he is confident that there is a good time coming. His friends do not know how severely he has been pinched. He keeps up his normal social relationships and activity. Wherever he goes, he radiates optimism. His faith in himself, in his fellow men and in his country is unshaken. He is out to get the most out of this hard experience. He is more of a man, by every standard, than he was when he held down what seemed an assured and comfortable position.

Then there are our school teacher heroines,—scores of them. Instance after instance could be recorded where a school board, confronted with the necessity of laying off one out of two teachers employed, found the one retained offering to divide her salary with the other in order that she might remain employed and the school maintained in all its old efficiency. These young women are proving they are "real" teachers; not merely holding down a job in order to earn a livelihood. They are demonstrating their love of their profession; they are in their acts teaching the finest of all lessons in character and citizenship.

Yes, these are the days of heroes. Thousands of them will never be known to others; their deeds and courage may never be sung; but they are leaving an impress on their generation, and making a contribution to the present and future of their country beyond all measurement or application of any known standard of value.

British Columbia Prunes

Best Quality Of Prunes Successfully Grown in Canada

As a result of experiments carried out in recent years at the Canadian Government Experimental Farm at Sidney, British Columbia, prunes of the best quality have been successfully grown and dehydrated. This development promises to be of importance to fruit growers on Vancouver Island, for it may mean that eventually prunes grown in British Columbia will find a ready market in Canada. The annual importation of prunes and dried plums into Canada is valued at about \$1,000,000.

A man may run into debt, but he seldom comes out of it faster than a walk.

Canada has a system of improved roads embracing over 75,000 miles.

Assistance For Farmers

Western Farmers Refuse To Accept Charity, Says Hon. Robt. Weir

Improvement in the quality of livestock, the purest possible strains in grains, grasses and fruits; rigid inspection to insure that the best quality of products were produced for export; uniform supply, and the bringing of the world markets to agricultural products by the cheapest routes, were advocated by Hon. Robert Weir, Dominion Minister of Agriculture, in an address at the "Agricultural Industries Dinner," of the Royal Winter Fair at Toronto.

Mr. Weir coupled these recommendations with a plea to financiers, manufacturers and others to assist financially and in other ways farmers in need of assistance.

Three years in the west there had been insufficient moisture. High winds and dust had created a situation that was unprecedented. People of the east had earned the undying gratitude of those in the west by their prompt response to appeals for aid. The western farmer, he said, had refused to accept charity and would not accept gifts. They would not accept relief unless they were allowed to sign notes in which they promised to pay when they were able.

Weighing only four ounces, a ladder of aluminum is being shown in London, England.

Silver mined in Mexico in a recent month weighed nearly 442,000 pounds.

Great Memorial Is Planned For Edison

Will Likely Be Huge Tower With Ever-Burning Light

Mrs. Thomas A. Edison has given her approval to a plan sponsored by the Chamber of Commerce and citizens of the Oranges and Maplewood for erection of a \$1,000,000 memorial to her late husband on a promontory overlooking the home and laboratories of the dead inventor.

Plans for the memorial have not been decided upon, but it is expected that its central feature will be a huge tower, surmounted by an ever-burning light to serve the entire metropolitan area as an aviation beacon.

A nation-wide committee, with President Hoover as honorary chairman, will be organized under present plans. The committee in charge plans to form organizations throughout the world for the purpose of raising funds for the memorial.

Navigating By Old Methods

Spanish Naval Officer Will Repeat Voyage Of Columbus

To repeat the voyage of Columbus under similar conditions is the plan of an enterprising Spanish naval officer, Capt. Don Julio Guillen. A replica of the Santa Maria used at Seville Exposition in 1929 is to be used for the trip. His crew will consist of 25, as compared with Columbus' 52, but he will navigate the ship by the old methods and will not employ any equipment or instrument invented later than 1492. Twenty nations of America, as well as the League of Nations, have expressed approval of the voyage. The "Santa Maria" will carry a large stone from Palos, the starting place of Columbus' venture, to be built into the monumental lighthouse at Santa Domingo which will commemorate the discovery of America.

Aid For Drought Stricken Areas

Ontario Knights of Columbus To Assist Saskatchewan Farmers

A province-wide scheme to aid the sufferers in the drought-stricken areas of South Saskatchewan, is being fostered by Ontario Knights of Columbus. An appeal was broadcast to the fraternal organization for aid, in the form of donations of money, food and clothing, by the Bureau of Charities at Regina.

Twelve centres will be organized to collect and send the requirements west, with headquarters at Ottawa. Other centres are situated at Brockville, Eganville, Toronto, Guelph, Sarnia, Hamilton, Port Arthur, Sault Ste. Marie, Barrie, Iroquois Falls and Cobalt. The railways have agreed to ship carload lots of donations free of charge.

License For Farm Dogs

Alberta Sheep Breeders Want Protection On Flocks From Stray Dog Menace

Farm dogs in Alberta will carry license tags in future if a resolution passed at the 23rd annual convention of the Alberta Association of Municipal districts, which was held in Edmonton, is finally approved by the Alberta legislature. Sheep breeders, who were well represented at the sessions, stressed the need of securing adequate protection for their flocks from the dog menace.

Calgary was selected as the convention city for 1932.

Useful In Camp.—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or lotion.

Ye Poor Editor

We had a real setback Monday the 13th. Some five or six weeks ago we ran a list of names of "those present" at a neighborhood reunion. Three hundred and nineteen names appeared in the list. Our "setback" was that a woman called us Monday morning and told us that her name was left out of the list and she knew we left it out on purpose.—Eric Record.

That Is the Question

Does that new alarm clock which has appeared in Europe and which plays a selection on a phonograph instead of ringing a bell, play: "Oh, it's nice to get up in the morning," or does it play "It's nicer to lie in bed?"

For a Central Bank

Queen's University Professor Points To Weakness In Our Banking System

Complete overhauling of Canada's monetary structure, and the establishment of a central bank which would assume the responsibility for credit control, were advocated by Professor C. A. Curtis, of Queen's University, in an address to the Canadian Club at Ottawa. At present, he said, no credit control existed in Canada, and its lack meant a greatly weakened monetary system. Before the war, such control had been exercised by the banks, but the passing of the Finance Act had resulted in removing this control from the banks while it had not yet been accepted by the government. Its re-establishment was much more important than the bringing back of the Canadian dollar to par.

Professor Curtis spoke on the Canadian monetary situation, and he traced the majority of Canada's monetary troubles back to the passing of the Finance Act shortly after the declaration of war. This act, he said, permitted the Finance Department to advance Dominion notes to the banks on presentation of satisfactory collateral. Prior to the war, Dominion notes could be issued up to \$30,000,000 backed to the extent of 25 per cent. by gold, but over that amount there must be dollar for dollar in gold. Consequently, at that time, a Dominion note was practically a gold certificate.

Royal Canadian Academy

Toronto Artist Wins High Praise For Portraiture

Accorded the distinction of being the best balanced show held in Canada in recent years, the 52nd exhibition of the Royal Canadian Academy was held in Montreal recently. Widely representative of the work done in practically every province of the Dominion and offering a broad range of styles, it dealt with the individual approach of the Canadian artist to his work in all its phases.

Of outstanding merit in this group were the two portraits by Mrs. Bart-Gerald of Toronto. Her "Portrait of Antimo Beneduce" is not only the most remarkable portrait of the entire exhibition, but it also can be ranked with the most serious work of contemporary artists in Europe.

Douglas' Egyptian Liniment relieves toothache and neuralgia. Invaluable in cases of croup, sore throat and quinsy. Keep a bottle handy.

Petition Refused

After an hour's discussion the council of Finsbury, England, decided by a majority of one vote, cast by the chairman, that the petition of a man asking to keep a wheelbarrow in his yard, be denied.

SAFE, SPEEDY PROVEN!

Safe—Buckley's contains no narcotics—absolutely safe for children and adults.
Speedy—Acts like a flash—a single slip proves it.
Proven—Thousands of testimonials and the largest sale of any cough remedy in Canada are convincing evidence of its merits. M-13

MIXTURE**

Boosting Northern Port

Expect Churchill To Be Scene Of Great Activity Next Year

The proposal from prominent government official in England, that coal from England be exchanged for wheat and livestock from western Canada, as a means of increasing inter-empire trade, is considered in well-informed circles as distinctly probable, and there is every possibility the Hudson Bay route will become one of the chief avenues of international commerce if this plan is adopted.

Given even a minimum of government support, in regard to lowered insurance rates, Hudson Bay next year will be a scene of great activity. Already a number of western cattlemen have indicated their intention of shipping cattle by the Bay route. Inquiries have been received regarding feeding possibilities for cattle being shipped over the Bay line. Plenty of hay will be available in The Pas next summer, and more will be shipped to the bay port from The Pas next spring. But all efforts of western organizations and provincial governments will be in vain unless, the Federal Government sees fit to lower insurance rates by absorbing some of the unusually high rates offered, and providing facilities for the unloading of return cargo here.

Miller's Worm Powders will not only expel worms from the system but will induce healthful conditions of the system under which worms can no longer thrive. Worms keep a child in a continual state of restlessness and pain, and there can be no comfort for the little one until the cause of suffering be removed, which can be easily done by the use of these powders, which are very effective.

Memorial To War Heroes

A great bell has been hung in the Castle of Roverto, now part of Italy, in memory of the soldiers who fell in the battles that raged round that town for nearly three years. Hungarians and Italians fought against each other, and the bravery of both is commemorated by the bell.

The London zoo once had an albino cobra, almost entirely white and with pink eyes.

Foods Stay Fresh Longer This Way

Canadian Gold Mines Playing Vital Part In Maintenance Abroad Of Our National Credit

When leading economists and bankers declare that Canadian gold mines are playing a vital part in the maintenance abroad of our national credit; that at home they are aiding materially in the return to prosperity; there are excellent grounds for Canadians to view the future with optimism. Never in the history of the industry have our gold mines been more capable of shouldering so heavy a responsibility.

Our mines are now producing over a million dollars of gold weekly, the highest rate achieved since the inception of gold mining on a commercial scale in Canada seventy-three years ago, and increases beyond this point are assured by expansion programs under way. Those sufficiently close to the picture will not be surprised to see Sir John Aird's prediction of \$100,000,000 a year realized well within the ten-year period conservatively allowed.

In its growth to one of the great mining countries of the world Canada is fulfilling early promise. A companion of Champlain discovered silver, copper and iron in Nova Scotia as far back as 1604. The Indian had previously found copper, and Jesuit fathers found and mined gold. But the first commercial mining of gold of which there are records, was ushered in with the discovery in 1858 of the famous Fraser River deposits in British Columbia.

From that time forward our gold mining industry met with varying fortunes, production during the period from 1858 to 1912 seeing many ebbs and flows consequent upon the development of discoveries in British Columbia and the Yukon. Gold has now been discovered in every province of the Dominion with the one exception of Prince Edward Island. At times annual gold production fell below a million dollars, at other times the three flowed strong. When Yukon was at the peak the total reached \$28,000,000, of which Yukon accounted for \$22,000,000. This record stood for twenty years, until, in fact, seven years ago.

With the discovery of Porcupine in 1909 and Kirkland Lake two years later a new and more brilliant era was commenced. Three years after Benny Hollinger, Sandy McIntyre, and Jack Wilson staked the Hollinger, McIntyre and Dome Mines, Ontario gave the first signs of coming greatness in a gold mining sense.

The possibilities of new mines being developed are conceded by those familiar with our mineralized areas to be immeasurably better than any other country in the world. This statement finds international support in the conclusions of the Gold Delegation of the League of Nations. This body, after due consideration, credited Canada with estimates of a rising scale of output over the next decade. Declines in the same period were predicted for all other countries.

Some idea of the benefits conferred on Canada by reason of the sensational development of gold mining in recent years can be gained from the fact that a million dollars weekly of gold production is being infused into the sluggish arteries of commerce. It is a well known fact that a large proportion of receipts goes for payrolls and supplies. A well-known banker who knows mining from long association in the North has estimated that every dollar spent in gold mining is multiplied twenty-five times as it courses through commercial channels.

"Some men thirst all their lives after fame, others after love, and others after money."
"But I know something that all men thirst after."
"What is that?"
"After salt herrings."—Karikaturen, Oslo.

W. N. U. 1918

From the standpoint of dividends our gold mines have built up a record of which any Canadian may be justly proud. Ontario gold mines alone, to the end of last year, had distributed to stockholders some \$105,000,000. In the current year, with general industry operating so largely "in the red" Canadian gold mines will show a substantial increase in dividends to approximately \$15,000,000. Ontario's share of this large sum will be about 94 per cent. One Ontario mine, Lake Shore, is distributing to its stockholders this calendar year, \$4,800,000, an amount equivalent to more than one-quarter of the total dividends of Canadian chartered banks for the same period.

The importance of our gold mines to Canada at this critical juncture is perhaps most graphically illustrated by the fact that the current year's production of gold will pay the annual interest on a billion dollars of foreign debt without disturbing our trade balance or impairing the position of the Canadian dollar on foreign exchanges.

By the close of 1934 the Canadian output of gold will reach \$1,000,000,000.—St. Catharines Standard.

Canadian Eggs For Export

Considerable Increase Shown In Estimate For This Year

It is estimated that this year 20,000 cases each containing 30 dozen eggs, will be exported to Great Britain from Canada. This marks a considerable revival from the exports in 1930 which totalled approximately 6,500 cases. Already over 8,000 cases of eggs have been shipped to Great Britain from British Columbia via the Panama Canal. The remainder of Canadian exports, originating in the Prairie and Eastern Provinces, will be shipped from Montreal before the end of November. Whether shipments are made by the short water way from Montreal or by the longer route through the Panama Canal, the eggs arrive in Great Britain in first class condition.

In order that the quality of Canadian eggs may be fully dependable at time of export all shipments are required by law to be graded according to Canadian standard grades of quality and inspected by Dominion Government inspectors before shipment.

The per capita yearly consumption of eggs in Canada is approximately 372, or more than one egg per day, every day of the year.

All He Had

The bridegroom had no visible means of support outside of his father yet it was a very fashionable wedding.

Precursor: "Repeat after me, 'With all my worldly goods I thee endow.'"
Bridegroom: "With all my worldly goods I thee endow."

His father (in loud whisper): "There goes his bicycle, Martha."

JUNIORS' AND MISSES' SEMI-FITTED COAT

Juniors' and Misses' semi-fitted coat, with front edges underfaced and rolled with collar. Darts at each side of back at waistline under removable belt, long sleeves with applied trimmings. Right front of coat is perforated for slanted outline. Seven pieces.

Proportionate Measurements
 Sizes 13 15 17 years
 Bust 31 33 35 inches
 Hip 34 36 38 inches

YARDS OF MATERIAL REQUIRED

Coat	With-out	With	Fur	Lin-
Size 54-in.	54-in.	3 1/4-in.	4-in.	39-in.
13 yrs.	2 1/2	2 1/4	1 1/2	1 2 1/2
15 yrs.	2 1/2	2 1/4	1 1/2	1 2 1/2
17 yrs.	2 1/2	3	1 1/2	1 3 1/4

Width at lower edge of coat, size 15, 1 1/2 yards.

Length at center-back from neck to lower edge, size 13, including 1-inch hem, 42 inches; size 15, 44 inches; size 17, 46 inches.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

A Wheat Menu

This Meal Consists Of Wheat From Soup To Nuts

A menu of all wheat "from soup to nuts," developed by Robert E. Brown, professor of theology at Oberlin, Ohio, College, will be presented to the national unemployment relief committee.

The menu is designed to aid both the hungry as well as the over-stocked wheat farmer. He made wheat soup by boiling wheat, straining off the water and seasoning; wheat-meal loaf with meal baked into a loaf; hot muffins from wheat ground in a coffee mill; parched wheat coffee and and parched wheat breakfast food.

Radium Discoveries Made In Western Canada May Prove To Be Of Great Significance

Canadian Exhibit Carries off Honors

Apples and Honey At Imperial Fruit Show Receive Awards

Right on the heels of news of better conditions in Britain following the elections comes the interesting information that Canadian apples and honey have begun to reassert their supremacy and make official appeal to all who like good things to eat. At the Imperial Fruit Show in Manchester, held recently, the Dominion did well. In the class open to the British Empire, which included exhibits from Australia, New Zealand and South Africa, as well as English-grown fruit, British Columbia secured two second awards, one for dessert and the other for culinary apples.

In the Canadian section honors were divided by British Columbia and Nova Scotia. The Western Province won first for McIntosh, Jonathan, Delicious and Newton, while the eastern side of the Dominion had the best Cox's Orange, King, Golden Russet, Spy, Greenings, Gravenstein and Baldwin. This indicates that the British public is being informed regarding the almost bewildering variety, as well as the excellence, of Canadian apples.

In the honey section there was even more success. Competing in three sections open to all Dominions and colonies, Ontario exhibitors won two first awards, and those from British Columbia one first, two second and three third prizes. This success is certain to attract the attention of British consumers, and should lead to an increase in the Dominion's export business in these wholesome delicacies, which should have a place in any well-regulated system of diet. — Toronto Globe.

Primitive Illumination

Indians In British Columbia Still Use Candle Fish

The candle-fish or oolichan is still being used by the Indians in some parts of British Columbia for illuminating purposes. After catching the candle-fish the Indians place them in a dry sheltered place, and wait till they are shrunken and all the water has evaporated from them. They then set the head or tail of the fish alight, and use the carcass as they would a torch. There is so much oil in the carcass that it provides a bright steady flame which burns slowly.

Can Detect Renovated Stamps

How renovated used stamps may be detected by use of violet rays and an acid was told during the trial in Lurgan, Ireland, of John Blaney, charged with using old insurance tax stamps. A government expert demonstrated how the process revealed the cancellation figures which had been erased from the stamps. Blaney was found guilty of using 29 stamps which had been used before.

CANADIAN BEES FOR ORIENT

When 10,000,000 Canadian bees sailed for China recently aboard the "Empress of Russia," they were given comfortable accommodation in the 48 cases shown in the photograph. The unique shipment was carefully handled by longshoremen, and while stored on the Canadian Pacific liner, the bees will be kept at a temperature of 45 degrees. As "bees nuclei," they cannot hatch at such a degree. Whether 10,000,000 bees, loosed in

the Orient war zone could inflict as much damage as half as many soldiers, or whether or not a bee is capable of stinging more than once were some of the speculations heard from a crowd of interested watchers while the loading was in progress.

Altogether there were 1,200 colonies, each with its Italian purebred queen, and were shipped from Taber, Alberta, by S. George Reidel, whose company is one of the largest honey-

producers in the British Empire. Mr. Reidel has already shipped two consignments of bees to China from his California apiaries, and is now taking leave of absence for five years, during which time he will demonstrate Canadian and American methods of bee culture in the Orient.

In the picture, from left to right, are Grover Reidel, breeder; Winfred Gear, Italian queen-breeder, and George Reidel, breeder and shipper.

Near Great Bear Lake, in the wilds of the Mackenzie district of Canada, mining engineers have been sinking pits into some recently discovered deposits of pitchblende. Working in several extensive veins that run beneath small lakes in the district, miners have dug out enough ore to yield forty tons of pitchblende. So valuable is this ore considered, according to Industrial and Engineering Chemistry, that half of the mined material has been carried to the nearest railroad by airplane.

The report goes on to say that "the twenty tons which have been brought out will yield from two to two and a half grams of radium. The richness of this ore, together with the low cost of mining it, indicates that here, at last, is a deposit well able to match itself against those in South Africa." The reference here is to the production of radium salts from ores mined in the Belgian Congo and exploited by a Belgian mining concern as one of the world's important sources of radium. According to the report quoted, these rich foreign resources "constitute a threat to those working with poorer ores."

Discovery of the Canadian deposits of pitchblende may have consequences of profound significance to industry and to medical science. If the ore supply tapped in Mackenzie yields as high as 50 per cent. uranium, as reported, it may prove to be a North American source of radium salts rich enough to provide much larger supplies for scientific and therapeutic use than prices set by foreign interests now make available. Pitchblende is not the only known mineral containing uranium—and, therefore, radium—but it is one of the most valuable ores mined for that purpose. Carnotite and autunite also are among the principal sources of the substance which has become so precious to science and industry.

A new industrial use of radium is the application of its gamma rays in testing of steel. The story of this scientific triumph forms a research narrative prepared by Professor Gilbert E. Doan, of Lehigh University and issued by the Engineering Foundation a few days ago. It is a coincidence that the world should be reminded of this newly discovered power of radium within a week of the announcement of recent progress at the pitchblende mines in Mackenzie.

The method by which engineers may now test sheets or beams of steel for hidden defects by the use of gamma rays is extraordinarily simple. It was first revealed to the world in September, 1930, by physicists of the Naval Research Laboratory in Washington. The process is somewhat similar to X-ray photography. Placing a tiny capsule of radio-active substance on one side of a twelve-inch steel girder, for instance, engineers paste a film of photographic plate against the other side. The resulting picture discloses even small flaws in the interior of the metal.

One great advantage of this process of X-raying heavy metals is that all necessary equipment may be carried about in a handbag—carried, as Professor Doan says, "into a submarine, to the top of a skyscraper, into a machine shop or foundry, anywhere that a large object may need examination." Of course the most serious drawback to the extensive use of such a method is the high cost of radium, but this situation may be altered in time by further discoveries of natural resources such as the pitchblende deposits found in Canada.—New York Sun.

A Likely Response

Commenting on the prevalence of slang, the Governor-General of Canada, speaking at Ottawa, made the statement that "our language is a glorious inheritance, a heritage worth preserving." The popular response, no doubt, will be that the language is "A1" and the Governor-General "O.K."

Machine-age methods are now used in the large vineyards of northern Africa.

Feather wings flapped by a gasoline motor propel an Austrian inventor's bicycle.

WORLD HAPPENINGS
BRIEFLY TOLD

Migration from Great Britain to the Dominion is not being encouraged or assisted at present, according to Hon. J. H. Thomas.

Lord Elibank moved a resolution in the House of Lords, urging no delay in calling the Imperial Conference in Ottawa.

Gold has been discovered in considerable quantities on the Homestake mine at Perry Creek in the East Kootenay, according to information received at Nelson, B.C.

Sir John Gilmour, Minister of Agriculture, has been appointed member of the British cabinet committee to attend the Imperial Economic Conference in Ottawa.

Henry Heikkinen, Port Arthur, Ont., has claimed bounty on the skins of nine timber wolves. He will receive \$225 for this record number of timber wolf skins.

No part of the world has a more assured economic future than Canada, Col. Hanford MacNider, United States Minister to Canada, told the New England Council at Boston.

Reconstitution of the British House of Lords to allow members from Canada and other Dominions hold seats is suggested by "Scrutator" writing in the Sunday Times.

Miss Ethel Catherwood, Saskatoon's Olympic champion, has taken up residence in San Francisco, where she will remain until after the 1932 Olympic games.

Edward Alexander McCourt of Kitchener was declared Alberta Rhodes' Scholar at a meeting of the selection committee held in Edmonton. McCourt has a brilliant scholastic and athletic record.

Commercial failures in Canada showed a decrease in September, totalling 165 compared with 192 in September, 1930. Liabilities of assignors totalled \$5,166,576 compared with \$2,081,474.

Production of railway rolling stock in Canada during 1930 was valued at \$104,992,701, the second highest figure on record. Of the 37 firms engaged in the industry four are in Manitoba and three in Alberta.

Dame Rachel Crowley, D.B.E., who was in Vancouver on her way to Great Britain from the conference of Pacific relations in the Orient, had words of praise for the work of the League of Nations in the Chinese-Japanese controversy.

Drouth-Resisting Plants

Introduction Of New Type Of Grasses
Might Be Of Great Value To
Canada

Dr. O. McConkey, formerly of the Ontario Agricultural College at Guelph, expresses the opinion that in Russia might be found several plants of immense value to Canada and the rest of the world. He suggests a new kind of exploration, a search for plants which may with the work of scientists bring millions of dollars to Canada. In particular he thinks a search should be made for drouth resisting strains of plants and grasses in Russia, and plants resisting high winds and heavy snows in Scandinavia.

Since Dr. McConkey made his report to the Empire marketing board, his theory has been confirmed by the discovery in Bechuanaland, South Africa, of hitherto unknown drouth resisting woolly finger grass which is stated to be capable of supporting stock for a year without rainfall.

Scores of plant diseases are found 10,000 feet in the upper air by experts in airplanes.

"We must do what a lawyer does when he has no clients or a doctor when he has no patients."

"What is that?"

"Marry."—Faun, Vienna.

W. N. U. 1918

Drought Remedy
Is SoughtSaskatchewan Commission Lays Plans
For Intensive Study Of Dry
Conditions

Saskatchewan's commission on conservation and afforestation, appointed by the Provincial Government to investigate causes of, and seek remedies for, recurrent drought in the southern portion of the province, laid definite plans for study and research at its initial meeting, Saturday, November 14.

Under chairmanship of Hon. J. F. Bryant, K.C., Minister of Public Works, the Commission formally accepted the responsibilities and duties as outlined in the order-in-council appointing it, and later struck committees from its membership to study various aspects of the subject as suggested in a report by Mr. Bryant, of a preliminary survey made by him. Members present at the meeting were: Hon. Mr. Bryant, Chairman; Prof. C. J. MacKenzie, Dean of Engineering, University of Saskatchewan; Dr. W. D. Cowan, M.P.; T. A. Patrick, M.D., Yorkton, and Lieut.-Col. F. J. O'Leary, Consulting Engineer, Regina. Hon. Wat. C. Buckle, Minister of Agriculture, was the only absentee, being confined to his home by illness.

After discussing the various suggestions arising from the preliminary report submitted by Mr. Bryant, the Commission laid down as its course of action that study should be made of the causes of drought conditions in Saskatchewan, together with a comparison of similar conditions in other parts of the world, the cause in each case, the steps taken to prevent their recurrence, and the results achieved.

In opening the meeting, Hon. Mr. Bryant outlined the preliminary steps taken to assemble data for the Commission. Numerous reports, books and documents dealing with problems of conservation and afforestation had been obtained from the Forestry Commission of England, the governments of France, Sweden, Germany, and the United States, from the government of the province of Ontario, the state of Nebraska, the different Australian states, and from many private individuals and organizations. Mr. Bryant intimated that the Canadian National Railway had placed at the disposal of the commission their engineering data and the services of T. C. Main, their chief water engineer who, for two months, had conducted a reconnaissance survey of dam sites suggested by secretary-treasurers of municipalities in the drought area in their replies to questionnaires sent out by the Commission. The Canadian Pacific Railway, similarly, had placed valuable data at the disposal of the commission, together with its engineering services in connection with dams and the conservation of water in Western Canada. Acknowledgment was made of the assistance given by Dr. A. W. Mackintosh, Queen's University; Frank J. D. Barnum, Montreal; T. Torgeson, Estevan; R. W. Ashton, Moose Jaw Technical School; Z. M. Hamilton, and many others. The chairman stated that, as the Commission was serving without remuneration and, as far as possible, without expenditure of public funds, it had been decided to assemble as much data as possible before calling a general meeting of the members. Approval of the preliminary steps taken by Mr. Bryant was given, by resolution, at the meeting.

The following committees were appointed to probe the various phases of the general problem:

On Afforestation:—Hon. Mr. Bryant, convenor; Hon. Mr. Buckle and Dr. Cowan.

On Conservation:—Dean Mackenzie, convenor; Col. O'Leary and Dr. Patrick.

On Soil Drift:—Hon. Mr. Buckle, convenor; Dean Mackenzie and Hon. Mr. Bryant. This committee was appointed to ascertain methods of combating soil drift, with a particular recommendation that it study a combination of hedge planting with a grass and clover and strip farming campaign, in order to make the best possible use of the government's carragana hedge project. To this end it was suggested that a single township be taken here and there throughout the drought area, to which methods recommended by the committee might be applied as a demonstration and starting point for a province-wide scheme. This committee was given authority to enlist the services of Norman Ross, chief of the Forestry Branch of the Federal Department of Agriculture; Dean A. M. Shaw, Agricultural College, Saskatoon; Prof. L. E. Kirk, Dominion Agrostologist; J. G. Taggart, superintendent, Experimental Farm, Swift Current, and others, in an advisory capacity.

A committee composed of Dean Mackenzie, convenor; Hon. Mr. Bryant, Dr. Patrick and Dr. Cowan, was appointed to study weather conditions, climate, rainfall, and water supply in their relationship to all external causes and effects operating in the drought area of the province and surrounding territories. It was further agreed that, with a view to investigating and developing the underground water supplies of Saskatchewan, Dr. A. T. Alty, Professor of Physics, and Dr. Mawdsley, Professor of Geology, both of the University of Saskatchewan, be requested to assist the committee on conservation. Dean Mackenzie assured the Commission that the entire staff and equipment of the provincial university were at its service, as the work was recognized

Christmas Seal Sale
PROVIDES FUNDS FOR
Fight Against Tuberculosis

The "San," Near Fort Qu'Appelle

Ideally located amid surroundings of great natural charm in the beautiful Qu'Appelle Valley, Saskatchewan's first Tuberculosis Sanatorium is an institution of which this province has every reason to feel proud as are its two sister institutions, located at Saskatoon and Prince Albert. In these, close to 800 patients are under constant treatment and as a result of the efficient manner in which the fight against tuberculosis is being waged the death rate in Saskatchewan is the lowest of any province in the Dominion and just over half that of the average for Canada as a whole. In Saskatchewan there are 46 deaths per 100,000 of population while in Canada there are 81 deaths per 100,000. Last year there were 407 deaths from tuberculosis in this province. Tuberculosis is still the greatest cause of death during the first thirty years of life, causing one out of every five deaths during this age period.

Funds for the maintenance of Sanatoria and the care of patients are provided by taxes and the knowledge that during these difficult times all unfortunate sufferers are being taken care of is comforting indeed. But in spite of all that is being done the loss, both in life and unemployment, from tuberculosis, is staggering. In Saskatchewan an equivalent of one funeral every day and two every Sunday occur as a result of this disease. And more than the number under treatment in our Sanatoria are convalescing in their homes and are still unable to work. The period of total disability from this disease averages about two years per person.

Education regarding tuberculosis is essential for the control of the spread of this dread disease. And never was the need for education greater than at present, as it is during times of depression, when a portion of our people are under-nourished or insufficiently clad, that tuberculosis makes the greatest headway.

The sale of Christmas seals is the chief source of revenue for educational and preventive work. The old saying "prevention is better than cure" applies with particular force in this connection. Preventive work is the most important phase of anti-tubercular work and this is financed by voluntary contributions. As a result of the sale of Christmas Seals last year, 5,525 persons in Saskatchewan received examination or other attention. The money raised by the sale of Christmas Seals helps finance the care of new-born babes whose mothers were tuberculous; helps pay for the examination of those who have been in contact with tuberculous patients; helps finance the examination of those suspected by their physicians of having tuberculosis; and helps carry on an educational campaign.

Letters are now being mailed to residents of every community in Saskatchewan containing sheets of Christmas Seals. Their value is one dollar a sheet—one cent a seal. These seals brighten up letters and parcels and the revenue they bring in helps to promote a great and necessary humanitarian work. Because the times are difficult the need for preventive work is greater than ever and the Anti-Tuberculosis League confidently relies upon the generosity of the people of Saskatchewan to enable it to meet whatever demands may be made upon it during the coming year.

Education regarding tuberculosis is essential for the control of the spread of this dread disease. And never was the need for education greater than at present, as it is during times of depression, when a portion of our people are under-nourished or insufficiently clad, that tuberculosis makes the greatest headway.

Recipes For This Week

(By Betty Barclay)

STRAWBERRY JELLY ROLL
(4 eggs)

¾ cup special cake flour, sifted.
½ teaspoon baking powder.
½ teaspoon salt.
¾ cup sifted sugar.
4 egg whites, stiffly beaten.
4 egg yolks, beaten until thick and lemon-coloured.
1 teaspoon vanilla.
Strawberry jelly.

Sift flour once, measure, add baking powder and salt, and sift together three times. Fold sugar into egg whites, a small amount at a time. Add egg yolks and vanilla. Fold in flour gradually. Pour into pan, 8½ x 13½ inches, lined with buttered paper, and bake in hot oven (400 degrees Fahrenheit) 13 minutes. Turn from pan at once onto cloth covered with powdered sugar. Remove paper. Quickly cut off crisp edges of cake. Spread with jelly and roll. Wrap in cloth until cool.

TARTE AUX OIGNONS

Slice thin four large onions. Put in a quart of cold, salted water. Add a teaspoon of sugar and bring to a boil on a quick fire. Cook a few minutes. Remove from the fire and drain. Add the onions to a quarter of a pound of butter that has been melted in a saucepan, and cook until they are lightly browned. Add three slices of bacon that have been cut into small pieces and cooked in butter. Let the mixture cool until it is just warm. Add three eggs beaten lightly with four tablespoons of cream. Fill tart shells with the mixture, pour melted butter over them, and bake until set.

Away To Good Start

When a new \$250,000 hospital was opened at Sutton, England, it was announced that the institution had the unique distinction of being entirely free from debt.

Fixing the depth of the Greenland ice cap at 8,850 feet, a German scientific group solved an ancient puzzle recently.

SUNDAY SCHOOL LESSON

DECEMBER 6

ROME AND BEYOND

Golden Text: "I have fought the good fight, I have finished the course, I have kept the faith."—2 Timothy 4. 7.

Lesson: Romans 15:22-29; 2 Timothy 4:6-18; Titus 1:5-16; 3:11-14.

Devotional Reading: Philippians 3. 7-14.

Explanations and Comments

The End Crowns the Work, verses 6-8.—The end is at hand, and calmly and deliberately Paul faces his end. "I am already being offered," he writes to Timothy. The margin of the Revised Version gives a closer translation of the Greek, "I am poured out as a drink offering." Paul's life is a libation; now the last drops are being poured out upon the altar of his uttermost devotion. "No doubt the special reason for the selection of this figure here is Paul's anticipation of a violent death. The shedding of his blood was to be an offering poured out like some costly wine upon the altar. But the power of the figure reaches far beyond that special application of it." "And the time of my departure is come." The word translated departure is literally unloosing, unmooring. Like a fully outfitted ship at its dock the apostle sees himself tugging at his moorings. He thinks of himself as about to weigh anchor and set out to sea on his last and greatest adventure.

"For the Christian, the last experience is not that of a dismayed vessel, just making the harbor; but of a bark, with all sails set, fretting at the anchor, and waiting to be set free. Surely this was Tennyson's thought when he gave us his well-known sonnet on 'Crossing the Bar.' 'Let there be no moaning at the bar, when I put out to sea.'—F. B. Meyers.

Then with exceeding great joy the apostle exclaimed as he reviewed his own life, "I have fought the good fight, I have finished the course, I have kept the faith." "Here is the old warrior laying aside his weapons, putting off his armor, going to his reward." "I have contested earnestly in the good contest"—for it is the athlete that the apostle has in mind; like a runner in the games "I have finished the course" ("course" here means an appointed track; I have completed the God-assigned stretch: see 1 Corinthians 9:24; Acts 20:24); as contestants keep the rules of the game so I have kept the rules of life's course, I have trusted in God, "I have kept the faith."

"Everybody is fighting, some for wealth, some for place and power. Many a pitiful contest is being waged in this world. Here is the one noble conflict in which the honest warrior will ultimately triumph and in which complete satisfaction will be his."

"I have finished the course": what is the course?

"Let me give another word. What is a racer? Not a man who runs anyway, but a man who runs over a marked-out track. And Paul says, 'I have kept the track.' He found the track. He followed the light. And when you and I become to be where Paul was when this letter was written, there will be only one question that will be worth asking, 'Have I kept the track? Have I followed God's light for me?'—Charles Brown.

"The tissues of the life to be weaved with colors all our own. And in the field of destiny we reap as we have sown."

—Whittier.

A Lucky Steeplejack

Watch Dropped From High Spire Was
Not Injured

Howard Boles, steeplejack, sat on the topmost point of the spire of St. James' Church, Toronto, and painted. He shifted his position, and his watch, kept in a pocket of his overalls, slipped out, and dropped. Later, he searched for the wreckage of the timepiece. There was no wreckage. The watch, as sound as the day it left the factory, ticked merrily away on a small patch of greensward on which it had alighted. Not even the glass was broken.

All of us are more or less foolish, but some of us insist on proving it.

Dragon flies in prehistoric times had a two-foot wing expansion.

"Please, sir, a burglar has broken into the room where your wife is."

"I can't help what trouble the burglar gets into—he can take the old hag if he likes."—Der Brummer, Berlin.

SAYS CANADA IS PROPER PLACE FOR EMPIRE MEET

London, Eng.—Canada is particularly fitted to be the scene of the next Imperial Economic Conference, the House of Lords was told by Viscount Elibank. Its size, world importance, and strategic position within the Empire were factors that gave Canada a commanding role to play as host to the conference. The Conservative peer introduced a motion which congratulated the National Government on its acceptance of the Canadian Government's invitation to hold the Conference in Ottawa, but expressed the opinion "stress of economic conditions throughout the empire demands the conference meet at the earliest possible date."

The motion sought to place the Upper House on record as expressing its satisfaction that "under the mandate recently given at the general election, the government will have at the conference a free hand to consider and employ any methods or plans best calculated to promote cause of the early fruition of the economic unity of the Empire." The motion was withdrawn after a full day's debate.

Viscount Elibank congratulated Prime Minister R. B. Bennett, of Canada, for the invitation of his Government to hold the conference in Ottawa. "The best way to commence negotiations with the Dominions for trade agreements," proceeded Viscount Elibank, "would be to put ourselves on the same level as the Dominions. Grant them, as a first step, a voluntarily comprehensive measure of preference at the earliest possible date."

Situation In India

Deportation Of Gandhi Urged If He Continues To Foment Trouble

London, Eng.—Drastic measures, including the deportation of the Mahatma M. K. Gandhi from India, were urged in the House of Lords to prevent renewal of Indian independence disturbances as a result of failure of the round table conference for a new Indian constitution.

Lord Elibank urged the deportation of Gandhi "if he foments further disturbances" when he returns to India, where his civil disobedience movement last year caused widespread disorders and economic suffering.

Lord Lothian, under-secretary for India, disclosed that a "grave situation" exists in India because of terrorist activities directed against British rule. He said the government intends resolutely to suppress terrorism.

Lord Brentford said that, since Gandhi started the civil disobedience campaign, at least 12 Englishmen have been murdered or murderously attacked.

The Gloomy Dean

Reference To Members Of House Of Commons Not Very Flattering

London, Eng.—Very Rev. William Ralph Inge, "Gloomy Dean" of St. Paul's cathedral, in a speech at the Guild Hall, said the House of Commons was largely made up of really delightful young gentlemen who only stood for parliament as a joke, without any expectation of being elected. "Nevertheless," he said, "I would much rather be governed by them than by the appalling set of scallywags whom I met when I last lunched at that august place."

Received By King George

London, Eng.—Prime Minister R. B. Bennett of Canada was granted an audience by the king. He has abandoned his proposed trip to the south of France and will remain in London for the rest of his stay abroad and probably sail for Canada on December 4.

National Resources Surplus

Edmonton, Alberta.—For the first six months natural resources were under administration of the province, a surplus of \$348,678 was earned, according to public accounts for the year ended March 31, issued by the Provincial Government.

China and Japan

If Japan Goes To War, She Will Commit Suicide, Says Speaker

Calgary, Alberta.—"If there is war, it will be tragedy," declared W. M. Birks, Montreal, a member of the Canadian delegation to the Institute of Pacific Relations at Shanghai, in an address here to a joint gathering of service clubs and the board of trade on the Manchurian situation. "And if Japan goes to war, she will commit suicide," he added.

Both China and Japan had rights in Manchuria, scene of present disturbances, and Mr. Birks believed a solution without warfare was imperative. Though Manchuria was a Chinese sovereignty, yet it was chiefly due to efforts of Japanese that the territory had been developed, he said in reviewing the rights of the two nations.

"When we get into trouble we have formed the habit of going west. The Slav goes east, and the Manchurian question may become a Russian question," he warned.

Mr. Birks outlined conditions in Japan and China, drawing the comparison of a highly organized nation and a loosely formed country. He also recounted work of the Institute of Pacific Relations.

Martyrs To Science

Montreal Physicians Succumb To Infection Contracted In Europe

Montreal, Que.—Second victim of a mysterious infection picked up while doing research work in continental universities two years ago, Dr. Joseph B. Gallagher, surgeon attached to the Montreal General Hospital, died after long suffering. The first victim was Dr. H. Stewart, who died six months ago.

The surgeons, friends, went to Europe in 1929 to do some post-graduate work in London, Berlin and Viennese hospitals. Both returned with a mysterious infection picked up apparently in the course of their work. Both are now dead from blood poisoning.

Dr. Gallagher, a native of Barth, N.B., graduated from McGill University in the class of 1910. In 1913 he went to British Columbia acting as physician and surgeon in a railway construction undertaking until 1916. He then enlisted in the army medical corps and served overseas.

Chinese Students Want War

Mob Of Eight Thousand Holds Up Railway Traffic

Shanghai, China.—Demanding a declaration of war against Japan, more than 8,000 Chinese students rioted here, held up all railway traffic and wrecked the station master's office until they were given five extra trains in which to go to the capital at Nan-king.

At intervening stations they were joined by 5,000 more students. They also demanded China's withdrawal from the League of Nations and the execution of Chang Hseuh-Liang, charging him with failure to resist the Japanese invasion of Manchuria.

Will Arrange For Business

L. S. Glass Appointed Trade Commissioner For British West Indies

Montreal, Que.—To develop trade relations between the West Indies and Canada, Lester S. Glass has been appointed trade commissioner for the British West Indies (eastern group) with offices here. The new commissioner, a member of the Canadian Trade Commission Service of the Department of Trade and Commerce, has been loaned to the West Indian Colonies for three years.

Ontario Auto Licenses

Toronto, Ont.—The Ontario Government, Wednesday, November 25, adopted the recommendation of Hon. Leopold MacAulay, Minister of Highways for Ontario, to raise license fees on all passenger cars. Four-cylinder cars, it is understood will pay \$8; six-cylinder cars, \$12; eight-cylinder cars, \$20; 12-cylinder cars, \$30; and 16-cylinder cars, \$40.

Still Out Of Work

Ottawa, Ont.—In Western Canada and in Ottawa, there are still nearly 500 former members of the staff of the Department of Interior who have not been placed in other departments of the Government service.

NEW DEPUTY MINISTER

Major J. C. Parmelee, who has just been made Deputy Minister of Trade and Commerce. For the past few years he has been Assistant Deputy Minister of Trade and Commerce, and has been with that particular department for more than thirty years.

End Of Shipping Season

St. Lawrence River Route Preparing To Close For Winter Months

Montreal, Que.—The St. Lawrence River route to the sea will soon be closed for the winter season, and there is an unusual hum of activity in the ports of Montreal and Quebec as shipping men hustle to complete their chartering and loading of the last vessels before ice seals the river. No more ocean passenger vessels will come from overseas ports to Montreal or Quebec this season. Several liners will leave Montreal for Quebec and the British Isles over the week-end.

The board of harbor commissioners here hope to exceed a figure of 90,000,000 bushels of grain exported from Montreal this season, considerably in advance of the 1930 total.

Viscount Snowden

Former Chancellor Of The Exchequer Takes Seat In House Of Lords

London, Eng.—Viscount Snowden, of Ickernshaw, clad in robes of scarlet and ermine, took his seat in the House of Lords recently.

The ceremony of centuries past was altered for the little man, former Chancellor of the Exchequer, who, hero of unnumbered fights in the House of Commons, was recently elevated to the peerage.

Lord High Chancellor Lord Sankey, in consideration of the physical infirmities of the former Chancellor of the Exchequer, arose and shook the new viscount's hand, obviating the necessity of kneeling for presentation.

The Service Loan

Says success Of Loan Will Speed Up Return Of Prosperity

Toronto, Ont.—Premier George S. Henry, of Ontario, in an address on the National Service Loan, said the success of the loan would speed up the return of prosperity from one end of Canada to the other.

The loan, he continued, "is a sign and symbol of our unity from the Atlantic to the Pacific," and "it is an opportunity for Canadians to show the world that they back their conviction with their cash."

Canada Sends Fine Exhibit

Farm Animals and Grain Entered At Chicago Show

Chicago—Canada has sent the finest representatives of 11 different breeds of farm animals popular in the Dominion to the 1931 International Livestock Exposition which opened here November 28. Canadian-bred horses will be represented by Percheron geldings from Montreal and Clydesdales from Govan, Sask.

Best samples of Canada's 1931 harvests will be on view at the international grain and hay show, the largest competitive crop exhibition in the world. Every agricultural section of the continent will be represented and the display will include the best samples of Australian wheat from the national show at Sydney, N.S.W., last Easter.

Twenty-eight boys and girls from Canadian farms will be among the 1,200 from all over the continent who will contest for the years' final honors in the ranks of the junior farmers.

Canadian Coal May Replace U.S. Product

Tests Indicate Feasibility Says Director Of Mines Branch

Ottawa, Ont.—Results of widespread and exhaustive tests of Nova Scotia and British Columbia bituminous coal indicate the feasibility of replacing with the Canadian product a large tonnage of American coals at present utilized, it was stated by John McLeish, director of the mines branch of the Dominion Government. Mr. McLeish has just returned from the conference on bituminous coal held in Pittsburgh, Pa.

It was stated by Mr. McLeish, in this connection, that already about 60 per cent. of the total coal requirements of the Winnipeg Electric Company are being obtained from Michel, B.C., while the Montreal company is trying out a large quantity of Nova Scotia coal.

Transport Food By 'Plane

Workers On Prince Albert National Park Will Receive Supplies By Air Route

Prince Albert, Sask.—Aeroplanes will be used this winter to carry food from here to isolated Federal Government relief camps in Prince Albert National Park, it was learned here. The road from here to the park will not be kept open, but two R.C.A.F. Fairchild 71's, now at Ladder Lake, will keep the 120 men in the various camps supplied with food.

The camps themselves are the movable variety, cabooses moved from point to point by tractors as the work of cutting the 120 miles of boundary around the park proceeds. Two weeks of supplies will be carried by each camp to provide a safety margin in case the weather is unsuited for flying for a protracted period.

Awarded Gold Medal

Winnipeg, Man.—Elizabeth Banning, of Winnipeg, has been awarded the Minnie Campbell gold medal of the provincial chapter of the Imperial Order Daughters of the Empire for the highest standing in English literature in the Province of Manitoba, it was announced here. In her grade examination, Elizabeth's standing was 98 per cent.

WHEAT POOL GUARANTEES SET AT HIGH FIGURE

Winnipeg, Man.—Overpayments by prairie wheat pools, guaranteed to the banks by the Governments of Manitoba, Saskatchewan, and Alberta, exceeded \$22,000,000, according to figures made public by high officials of the three provinces. The guarantees were made in March, 1930, after wheat prices had slumped from high marks on which the pools had based their initial payments.

Saskatchewan's liability is \$13,305,000, Hon. M. A. MacPherson, Provincial Treasurer, announced. Hon. R. G. Reid, Treasurer in the Alberta Government, said the foothills province had guaranteed pool advances for \$5,526,000. A few days ago Premier John Bracken gave Manitoba's liability as \$3,333,000, but he did not indicate if this figure was the exact amount of his government's guarantee.

As bonds on wheat pool assets, such as elevators, are held by the three governments, losses which will be sustained by the provinces are not known, except in the case of Manitoba. Premier Bracken said \$1,333,000 was unsecured.

Campaign Against Drouth

Wide Interest Is Being Taken In Saskatchewan Commission

Regina, Sask.—Full and intelligent discussion of the problems of farmers in the dry areas will be the chief factor in the success of the campaign against drouth now being conducted in southern Saskatchewan, Hon. J. E. Bryant stated. Mr. Bryant is chairman of the commission on conservation of water and afforestation, recently appointed.

Wide interest is being taken in the work of the commission, said Mr. Bryant, and told of a "better farming society" formed at Springwater. The society will meet at the most central point in the district every two weeks to discuss and exchange ideas.

Mr. Bryant strongly advocated this move, and states that the commission will do all in its power to assist such organizations, supplying literature, etc.

Canada Is Growing

Census Figures Would Indicate Population Is Well Over Ten Million

With population figures complete for the three maritime provinces, Ontario, and the three prairie provinces, it would appear that the total population of the Dominion at the 1931 census will be well over the ten million mark. With Quebec, British Columbia and the Northwest Territories yet to come the population is 6,783,429. Placing these at the same figures as in the 1921 census the total for the Dominion would be approximately 9,681,000 so that to reach ten millions all British Columbia and Quebec together would have to gain would be 319,000 and it is generally expected that their gains will be considerably more than that.

Auto Output Drops

Ottawa, Ont.—Production of automobiles in Canada for October totalled 1,440, according to a report issued by the Dominion Bureau of Statistics. When compared with the figures for September, the output of passenger cars fell from 2,108 to 761, while trucks advanced from 538 to 679.

Does Not Affect Canada

Ottawa, Ont.—Increase by the French Government of the minimum percentage of native wheat millers are required to use in bread flour from 90 to 97 per cent. will have a comparatively slight effect upon Canadian exports, officials of the Department of Trade and Commerce said.

Missionaries Lost In Yukon

Anchorage, Alaska.—Two aeroplanes were despatched recently from McGrath, in western Alaska, to search for Brothers George J. Feltes and Marshal Lapeyre, Catholic "flying missionaries," long overdue on a flight from McGrath to Holy Cross Mission on the lower Yukon.

Electric refrigerators are being rented in Bombay, India.

MEMBERS OF TRANSPORTATION PROBE COMMISSION

Mr. Justice Lyman P. Duff, of the Supreme Court of Canada (left), has been appointed chairman of the newly launched commission to enquire into Canadian transportation problems. Among the members of the Commission is Sir Joseph Flavelle (right), of Toronto. The probe is expected to commence shortly before the middle of December.

CHAPTER VII.—Continued.

This reflection stung her pride — exactly as Conscience had intended it should, without doubt. Last night there had seemed to her no question about the quality of that farewell in the little screened-off alcove. There had been nothing common or "cheap" about it. The gathering incidents of the whole day, the fight through the storm, the prelude of "Valse Triste," all seemed to have led her by imperceptible degrees to a point where she and the Englishman could kiss at parting without shame. And now, with the morning, the delicate rainbow veiling woven by romance was rudely torn asunder, and the word "cheap" dinned in her ears like the clapper of a bell.

The appearance of her "premier déjeuner" came as a welcome distraction from her thoughts, and with the consumption of "café au lait" and the crisp little rolls, hot from the oven, accompanying it, the whole matter began to assume a less heinous aspect. After all, argued Jean's weak human nature, the unconventionality of the affair had been considerably tempered by the fact that the Englishman had practically saved her life during the course of the day. Alone, she would undoubtedly have foundered in the drifting snow; and when a man has rescued you from an early and unpleasantly chilly grave, it certainly sets the acquaintance between you, however short its duration, on a new and more intimate plane.

"Good-bye, little comrade; thank you for my magic moment."

The words, and the manner of their utterance, came back to Jean, bringing with them a warm and comforting reassurance. The man who had thus spoken had not thought her cheap; he was too fine in his perceptions to have misunderstood like that. She felt suddenly certain of it. And the pendulum of self-respect swung back into its place once more.

Presently she caught herself wondering whether she would see him again before she left Montavan. True, he had told her he was going away next day. But had he actually gone? Somewhere within her lurked a fugitive, half-formed hope that he might have altered his intention.

She tried to brush the thought aside, refusing to recognize it and determinedly maintaining that it mattered nothing to her whether he stayed or went. Nevertheless, throughout the whole day—in the morning when she made a pretence of enjoying the skating on the rink, and again in the afternoon when she walked through the pine-woods with the Varignys—she was subconsciously alert for any glimpse of the lean, supple figure which a single day had sufficed to make so acutely familiar.

But by evening she was driven into accepting the fact that he had quitted the mountains, and of a sudden Montavan ceased to interest her; the magic that had disguised it yesterday was gone. It had become merely a

dull little village where she was awaiting Lady Anne Brennan's answer to her father's letter, and she grew restlessly impatient for that answer to arrive.

It came at last, during the afternoon of the following day, in the form of a telegram: "Delighted to welcome you. Letter follows."

The letter followed in due course, two days later, the tardiness of its arrival accounted for by the fact that the writer had been moving about from place to place, and that Peterson's own letter, after pursuing her for days, had only just caught up with her.

"I cannot tell you," wrote Lady Anne in her squarish, characteristic hand, "how delighted I shall be to have the daughter of Glyn and Jacqueline with me for a time. Although Glyn with a grown-up daughter sounds quite improbable; he never really grew up himself. So you must come and convince me that the unexpected has happened."

Jean liked the warm-hearted, unconventional tone of the letter, and the knowledge that she would so soon be leaving Montavan filled her with a sense of relief.

During the four days which had elapsed since the Englishman's departure her restlessness had grown on her. Montavan had become too vividly reminiscent of the hours which they had shared together for her peace of mind. She wanted to forget that stolen day—thrust it away into the background of her thoughts.

Unfortunately for the success of her efforts in this direction, the element of the unknown which surrounded the Englishman, quite apart from anything else, would have tended to keep him in the forefront of her mind. It was only now, surveying their acquaintance in retrospect, that she fully realized how complete had been his reticence. True his figure dominated her thoughts, but it was a figure devoid of any background of home, or friends, or profession. He might be a king or a crossing-sweeper, for all she knew to the contrary—only that neither the members of the one nor the other profession are usually addicted to sojourning at Swiss chalets and forming promiscuous friendships on the ice.

There were moments when she felt that she detested this man from nowhere who had contrived to break through her feminine guard of aloofness merely to gratify his whim to spend a day in her company.

But there were other moments when the memory of that stolen day glowed and pulsed like some rare gem against the even, grey monotony of all the days that had preceded it—and of those which must come after. She could not have analysed, even to herself, the emotions it had awakened in her. They were too complex, too fluctuating.

As she packed her trunks in preparation for an early start the following day, Jean recalled with satisfaction the genuine ring of welcome which had come from England. Until she had received it, she had been the prey of an increasing diffidence with regard to suddenly billeting herself for an indefinite period upon even such an old friend of her father's as Lady Anne—a timidity Peterson himself had certainly not shared when he penned his request.

Give my little girl house-room, will you, Anne?" he had written with that candid and charming simplicity which had made and kept for him a host of friends through all the vicissitudes of his varied and irresponsible career. "I am off once more on a wander-year, and I can't be tripped up by a petticoat—certainly not my own daughter's—at every yard. This isn't quite as cynical as it sounds. You'll understand, I know. Frankly, a man whose life, to all intents and purposes, is ended, is not fit company for youth and beauty standing palpitating on the edge of the world. By the way, did I tell you that Jean is rather beautiful? I forget. Let her see England—that little corner where you live, down Devonshire way, always means England to my mind. And let her learn to love Englishwomen—if there are any more there like you."

And, having accomplished this characteristic, if somewhat sketchy provision for his daughter's welfare, Peterson had gone cheerfully on his way, convinced that he had done all that was paternally incumbent on him.

Madame de Varigny was voluble in her regrets at the prospect of losing her "chère Mademoiselle Peterson," yet in spite of her protestations of

Each Spoonful

SCOTT'S EMULSION

of Norwegian
Cod Liver Oil
Builds Resistance
Easy to Digest

dismay Jean was conscious of an impression that the Countess derived some kind of satisfaction from the imminence of her departure.

She could not reconcile the contradiction, and it worried her a little. She believed—quite justly—that Madame de Varigny had conceived a real affection for her, and, as far as she herself was concerned, she had considerably revised her first impressions of the other, finding more to like in her than she had anticipated, noticeably a genuine warmth and fervour of nature, and a certain kind-hearted capacity for interesting herself in other people.

And, liking her so much better than she had at first conceived possible, Jean resented the sudden recurrence of her original distrust produced by the suggestion of insincerity which she thought she detected in the Countess's expressions of regret. On the face of it the thing seemed absurd. She could imagine no conceivable reason why her departure should give Madame de Varigny any particular cause for complacency, which only made the more perplexing her impression that this was the actual feeling underlying the latter's cordial interest in her projected visit to England.

On the morning of her departure, Jean's mind was too preoccupied with the small details attendant upon starting off on a journey to dwell upon the matter. But, as she shook hands with Madame de Varigny for the last time, the recollection surged over her afresh, and she was strongly conscious that beneath the other woman's pleasant, "Adieu, mademoiselle! Bon voyage!" something stirred that was less pleasant—even inimical—just as some slimy and repulsive form of life may stir amid the ooze at the bottom of a sunlit stream.

(To Be Continued).

Persian Balm—the perfect aid to beauty. Essential to real feminine distinction. Results always in the highest expression of beauty. Its use keeps the hands always soft and flawlessly white. Indispensable to the whole family. Imparts added charm to the mother. Serves the father as a hair fixative and cooling shaving lotion, and protects the tender skin of the child. Persian Balm is the true toilet requisite.

Sees Improved Conditions

London Governor Of Hudson's Bay Company Pleased With Visit To Canada

P. Ashley Cooper, of London, England, governor of the Hudson's Bay Company, who sailed for home recently, on the White Star liner "Britannic," said conditions in Canada are better than is generally known.

"Conditions were definitely better than I had believed before I went there," he said. Mr. Cooper spent two and a half months visiting the company's branches throughout western Canada.

Speaking of tariff proposals as protection for the empire, he said: "A tariff is essential to England, not that I believe in a tariff, but we must do it to protect ourselves against the high tariff walls erected by other nations."

'Plane To Race Sun

Has Been Designed By Famous German Aircraft Builder

An aeroplane to fly the stratosphere and race the sun around the earth has been constructed by Dr. Hugo Junkers, famous aircraft builder of Dessau, Germany, it was revealed at Cleveland.

The 'plane, designed to fly 1,000 miles an hour, was described by G. S. Vonheydekamp, a research engineer, here to attend a national clinic on metals and alloys. He recently viewed the new 'plane at the Junkers 'plant.

He said the craft has the appearance of the usual low-wing cabin monoplane, only that it has an exceptionally long fuselage. It is an all-metal 'plane, built of duralumin.

To permit the engine to run in the rarified atmosphere at an altitude of more than seven miles, the air is fed to it by a compressor of new design.

THE RHYMING OPTIMIST

By Aline Michaels

MEMORY

Time was he came for but a day, an hour
And then must turn from out my silent street,
Some beauty taking with him from each flower,
And leaving lark songs by a shade less sweet.
And in the intervals I saw him not.
Life, flowing, seethed and swept us far apart—
Took even the thought of him to some strange spot
I could not reach with all my longing heart.
And now he enters here no more at all.
The quiet garden never hears his tread.

He does not come to watch the bright leaves fall.
For him spring's litany remains unsaid.
Yet, in some fashion I cannot explain,
I keep him by me, never to go again!

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own best argument—its own best advertisement. If you suffer from asthma get this time-tried remedy and find help like thousands of others.

To Speed Correspondence

Typewriter-Telegraph System To Be Installed In Homes and Offices

Spirited competition between the American Telephone and Telegraph Company on the one hand, and the Western Union and Postal Telegraph Companies on the other, began in a new system of local and long-distance message communication.

Automatic typewriter-telegraph instruments, with standard typewriter keyboards, will be offered for installation in homes and offices. The machines will be similar to those used for the transmission of telegraphs and for the nation-wide distribution of news by press associations.

Under the new system a subscriber to the service may signal a central operator and have his machine connected with the machine of any other subscriber, whether that person is in the next building or on the other side of the country.

To Manufacture Typewriters

Stated That Plant Will Be Constructed Immediately In Toronto

Announcement that a plant for the manufacture of typewriters would be constructed immediately in Toronto followed the imposition of the emergency British tariff against imported manufactured goods.

The United Typewriter Company, Ltd., until now the Canadian distributing and assembling representative of the Underwood Typewriter Company of the United States, will build a plant for manufacture of these machines for export to Great Britain.

And Called By Fancy Name

Catfish skins, exported from Yarmouth, Nova Scotia, to the United States, make a soft and pliable leather, which is readily dyed in gay or sombre colours and is used in the manufacture of ladies' handbags and shoes.

HOW SHE KEEPS HER WEIGHT DOWN

"I do secretarial work, and therefore lead a more or less sedentary life," writes Miss L. M. A. "I find a small dose of Kruschen Salts every morning keeps me perfectly fit and in good condition. My normal weight is 116 lbs., and having taken Kruschen Salts regularly for three years, I never put on surplus weight."

You cannot put on superfluous flesh when you are as healthy and active as you must be if you take Kruschen Salts. Activity is the enemy of fat.

When you take vitalizing Kruschen Salts for a few days that old indolent arm-chair feeling deserts you—it doesn't matter how fat you are—the urge for activity has got you—and you're "stepping lively."

And best of all you like this activity—you walk a couple of miles and enjoy it—you thought you'd never dance again, but you find you're getting as spry as ever—the old tingling, active feeling reaches even your feet.

One bottle is enough to prove to you that Kruschen will make you feel younger—spryer—more energetic—you'll enjoy life—every minute of it.

Little Helps For This Week

"The Lord is nigh unto all them that call upon Him, to all that call upon Him in truth."—Psalm cxlv. 18.

The Heart's unspoken pain He knows,
The secret sighs He hears full well,
What to none else thou dar'st disclose.

To Him thou may'st with boldness tell;

He is not far away, but ever nigh,
And answereth willingly the poor man's cry.

—Paul Gerhardt.

The Lord can prevent trouble, or remove trouble; but what is best of all, He can sanctify troubles, making them real blessings, and that is what He, out of infinite love, generally chooses to do.

—Christian's Pocket-Book.

Wise mothers who know the virtue of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

India's Complex Calendar

Every Day In Week Has Several Different Names

To each of the 17 calendars used in India, a Hindu compiler devotes three months in preparation. It is also recorded that the earliest example known of a well authenticated week-day in Indian inscriptions is in a year corresponding to A.D. 484—6, the years years after Buddha died. Since then the following complexity of different names of week-days has arisen, as recorded by Robert Sewell in The Indian Calendar. Sunday has more than 12 names; Monday has more than 6 names; Wednesday has more than 5 names; Thursday has more than 7 names; Friday has more than 8 names; Saturday has more than 4 names.

WHEN FOOD SOURS

ABOUT two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient and harmless. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for correcting excess acids. 50c a bottle—any drug store.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior toothpaste that safeguards against acid-mouth. (Made in Canada.)

WHEN BUSINESS IS NEEDED**"My son," ran an editorial in the
Bridgeport (Conn.) Post: "there's nothing
on earth so mysteriously funny
as an advertisement. The prime, first,
last and at all the time object of an
advertisement is to draw custom. It
is not, was not, and never will be designed
for any other human purpose. So the
merchant waits till the busy season
comes and his store is so full of custom
that he can't get his hat off, and then
he rushes to his printer and goes in for
advertising.""When the dull season gets along
and there is no trade and he wants
to sell goods so bad he can't pay his
rent, he stops advertising. That is,
some of them do, but occasionally a
level headed merchant does more of
it and scoops in all the business, while
his neighbors are making mortgages
to pay the gas bill.""There are times when you couldn't
stop people from buying everything
in the store if you planted a cannon
behind the door, and that's the time
the advertisement is sent out on its
mission. It makes light work for the
advertising, for a chalk sign on the
sidewalk could do all that we needed
and have a half holiday six days in
the week; but who wants to favor an
advertisement? They are built to do
work and should be sent out in the
dull days when a customer has to be
knocked down with hard facts and
kicked insensible with bankrupt
reductions and dragged in with irresistible
slaughter of prices before he will
spend a cent.""That's the aim and end of advertising,
my son, and if you open a store
don't try to get them to come when
they are already sticking out of the
windows, but give them your advertisement
right between the eyes in the
dull season and you will wax rich
and own a fast horse and perhaps be
able to smoke a good cigar once or
twice a year.""Write this down where you'll fall
over it every day. The time to draw
business is when you want business,
and not when you have more business
than you can attend to already."**CHRIST CHURCH, CARBON**
